

INFORMATION SYSTEMS DIVISION (ISD) EXPANDS ITS WEB DESIGN AND GRAPHICS DEPARTMENT!

Information Systems Division, Inc. is pleased to announce the expansion of its web/graphic design and marketing services. In hiring Steve Monosson, our firm is excited to bring an 18 year advertising veteran to our already strong team.

Steve has already finished redesigning the ISD web site (you can see a snapshot of the home page at the above [<http://www.isdtech.net>]), as well as the site for ERA Cavanagh-Wright Real Estate (snapshot can

be seen at left [<http://www.eraofoneonta.com>]). He's been privileged to work alongside veteran ISD web wizard Wilhelmina "Willie" Guest, who just recently completed the health insurance section of the Otsego County Chamber of Commerce site. Willie has been providing excellent service and design to ISD web clients for several years now.

We invite you to check out these latest sites and see what others are already talking about. Along with

the web and graphic design services, we can also talk with you about branding, identity, photography — all of your business needs in effectively communicating your products and services to the public and/or targeted audience.

For a free consultation and/or price quote, please contact Steve Monosson at (607) 432-7090, ext. 37, or via email at smonosson@isdtech.net. *Your business will thank you!*
